

Material Safety Data Sheet

Product name	Full cream goat milk powder
Specification number	100.03
Composition	Spray dried full cream goat milk. Ingredient for food industry contains fat, protein, carbohydrates and minerals. Details in product specification.
Cas number	Not applicable.
Health hazards	Non-hazardous product. A small number of people are sensitive to inhalation of dust and skin contact for prolonged periods.
Fire hazards	Combustible substance. If ignited would give Class A fire. Avoid contact with potential sources of ignition. Remove powder deposits regularly.
Precautions	No special precautions necessary.
Handling / Storage	Store product in cool and dry conditions, away from direct sunlight and heat. Relative humidity preferably max. 65%. Temperature preferably 10-20 deg.C.
Protection	For operator comfort, avoid excessive dust and prolonged skin contact. Respiratory protection is advised when dust is unavoidable. Incorporate standard precautions against dust explosions into bulk handling equipment, e.g. fluid conveyors, silos, etc. Remove spillage using a vacuum cleaner.
Physical / Chemical data	Form: powder. For details see Product Specification Sheet.
Stability / Reactivity	Like any other powdered product, there is a risk of explosion in a confined cloud.
Toxicological	Non-toxic.
Ecological	No special requirements.
Removal	Clean with vacuum cleaner and water.
Transport	Harmless cargo.
Legislation	No special information.
Remarks	The above indications are the result of present knowledge and experience as well as available literature.
