5.2 Special hazards arising from the product

Under conditions giving incomplete combustion, hazardous gases produced may consist of: carbon monoxide (CO) carbon dioxide (CO₂). Combustion gases of organic materials must in principle be graded as inhalation poisons. Combustion produces caustic fumes. Vapours are heavier than air and may spread along floors.

5.3 Advice for firefighters

Wear self-contained respiratory equipment and appropriate protective clothing at all times. Remove containers in close proximity to the fire and cool the exterior of the container with water spray. Collect and contain any firefighting media which is used. Keep all personnel away from the fire and upwind.
