We certify that the above compound is in compliance with the Standards of the International Fragrance Association (IFRA 48<sup>TH</sup> Amendment published June 25); provided it is used in the following class(es) at a maximum concentration level of the above.

“Oak moss extracts used in fragrance compounds must not contain added tree moss, which is a source of resin acids. Traces of resin acids may be carried over to commercial qualities of oak moss in the manufacturing process. These traces must not exceed 0.1% (1000ppm) dehydroabietic acid (DHA) in the extract. The concentration of resin acids in oak moss can be measured with an HPLC Reverse Phase - spectrofluorometry method. Further, levels of atranol and chloroatranol should each be below 100ppm in oak moss extracts”

It is ultimately the responsibility of the customer to ensure the safety of the final product that contains this material including carrying out further testing if necessary.

| IFRA class(es) [see annex for details] | Max level of use (%) |
|--|----------------------|
| Class 1                                | Not approved.        |
| Class 2                                | 0.06                 |
| Class 3A                               | 0.2                  |
| Class 3B                               | 0.2                  |
| Class 3C                               | 0.2                  |
| Class 3D                               | 0.2                  |

| Class 10A | 0.2             |
| Class 10B | 0.2             |
| Class 11  | Not Restricted. |

For other kinds of application or use at higher concentration levels, a new evaluation may be needed.

The IFRA Standards regarding use restrictions are based on safety assessments by the Panel of Experts of the RESEARCH INSTITUTE FOR FRAGRANCE MATERIALS (RIFM) and are enforced by the IFRA Scientific Committee.

Evaluation of individual Fragrance ingredients is made according to the safety standards contained in the relevant section of the IFRA Code of Practice.

This certificate serves only as a guide to the maximum level of use. It is the ultimate responsibility of the customer to ensure safe formulating principles are utilised and the safety of the final product (containing this fragrance), by further testing if need be.

Note 1: It is recommended that any material used to impart perfume or flavour in products intended for human ingestion should consist of ingredients that are in compliance with appropriate regulations for foods and food flavourings in the countries of planned distribution.

Note 2: Trials must be performed to satisfy suitability for specified application.

**DISCLAIMER:** This information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Such information is, to the best of the company's knowledge and belief, accurate and reliable as of the date indicated. However, no warranty guarantee or representation is made to its accuracy, reliability or completeness. It is the user's responsibility to satisfy himself as to the suitability of such information for his own particular use.

## IFRA Conformity Certificate

Pot pourri, powders, fragrancing sachets, liquid refills for air fresheners (non cartridge systems), reed diffusers.  
Liquid refills for air fresheners (cartridge systems).  
Shoe polishes.  
Deodorisers/ maskers not intended for skin contact ( e.g. fabric drying machine deodorisers, carpet powders)  
Insecticides (mosquito coil, paper, electrical, for clothing etc.) excluding aerosols.  
Scent delivery system using a dry air technology that releases a fragrance without sprays, aerosols or heated oils (technology of nebulisation).  
Air freshening crystals.  
Toilet blocks.  
Joss sticks or incense sticks.

Machine dishwash detergent and deodorisers.  
Machine only laundry detergent (e.g. liquitabs)\*\*  
Plastic articles (excluding toys).  
Fuels.  
Fragranced lamp ring.  
Scent pack.  
Scratch and sniff (sampling technology).  
Paints.  
Cat litter.  
Animal sprays (all types)  
Treatment products for textiles (e.g. starch sprays, fabric treated with fragrances after wash, deodorisers for textiles or fabrics).  
Floor wax.  
Odoured distilled water (that can be added to steam irons).

Class 11B

\* Class 5, Facial masks: There are several types of masks: peel off (similar to rinse-off, rinse-off and leave-on (you only remove the excess with a facial tissue). To ease the split the most restrictive, i.e. leave-on is applied for all.

\*\* Liquitabs corresponds to a dose of liquids wrapped in a film: no contact with hands is expected under normal conditions of use

**The table was prepared with the intention to cover the vast majority of the products; however it may not cover some specific applications. In this case other classes may be attributed based on a specific risk assessment.**
