4. FIRST AID MEASURES

Eye Contact: Rinse with copious amount of water. Consult doctor.
Inhalation: Remove to fresh air. After over exposure consult doctor.
Skin Contact: Wash with soap and water.
Ingestion: Consult a physician.

5. FIRE FIGHTING MEASURES

Extinguishing Media:

/ watermist

/ foam

(/ recommended x must not be used)

/ CO2

/ dry powder

Special Exposure Hazards: May produce noxious fumes -oxides of carbon, nitrogen.

Special Fire Fighting Precautions: Wear impervious clothing and self contained breathing apparatus. May form flammable/explosive dust clouds in air.

6. ACCIDENTAL RELEASE MEASURES

Personal Protection: See section 8. Control dust. Provide sufficient ventilation.

Disposal Considerations: See sections 8/13.

Measures for Containing Spillage: Cover with inert material (eg sand).

Measures for Cleaning up: Remove diluted spillage with vacuum cleaner. Wash spillage site with water. Minimise dust cloud formation.

Environmental Precautions: Advise local river or water authority if spillage has entered water course or sewer.

7. HANDLING AND STORAGE

Store at room temperature (15-25°C recommended) in original resealed containers and protected from direct sunlight and moisture.
Use LEV throughout handling processes.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

When handling dry powder, local exhaust ventilation (LEV) is essential to minimise worker exposure. UK limits (long term total dust and respirable dust) on exposure are published annually in Guidance Note EH40, HSE.

Dust: Long term total dust: 10 mg/m³ / 8 hr TWA

Respirable dust: 4 mg/m³ / 8 hr TWA
