

SPECIFICATION SHEET

Dec. 2014 Revised

SunCat[®] MTA

SunCat[®] MTA is a member of the SunCat[®] next generation of encapsulated approved chemical sunscreen dispersion. These are the safest and most comfortable sunscreens to be found for year-round broad spectrum UV protection. With its special enwrapped form for even protection, it is much safer in use, being Non-irritant and not absorbed into the skin. It is also much easier to formulate to sunscreen end products.

Composition:

Sunkem [®] AVO (Butyl methoxydibenzoylmethane)	19.0 % ~ 21.0 %
Sunkem [®] OMC (Ethylhexyl methoxycinnamate)	19.0 % ~ 21.0 %
Sunkem [®] OTC (Octocrylene)	9.5 % ~ 10.5 %

Appearance:

Off-white to beige cream
