

PROTELAN AG 915 SF

Basic material for the formulation of bath preparations and hair shampoos

Chemical Composition

Sodium cocoyl glutamate

INCI name: Sodium Cocoyl Glutamate

Appearance: clear, colourless liquid

Ionic character: anionic

Typical data

Dry matter: 24 %

Application

PROTELAN AG 915 SF is solvent-free and based on renewable raw materials.

PROTELAN AG 915 SF can be combined with anionic, nonionic and amphoteric surfactants and improves the skin compatibility of mild body cleansing agents.

PROTELAN AG 915 SF affects the foaming characteristics of surfactant preparations positively. Besides the foaming power, the foam stability and foam structure are improved.

In combination with ether sulfates PROTELAN AG 915 SF offers moisturising properties for hair and skin cleansing formulations and imparts a smooth skin feeling.

Storage

Storage at lower temperatures may lead to turbidity and possible separation, which can be removed by stirring and gentle heating without quality decrease.

The above results have been obtained from trials in our laboratory and plant. In the light of changing conditions they can serve only as a guide and are therefore offered without obligation. We ask you to observe the possible rights of third parties.
